

# Link Direction Component

LangLinkDir1

The screenshot shows the TXLangLinkDir interface. On the left is a diagram area with a grid background. A horizontal bar contains several icons, including a red square with a double-headed arrow, which is highlighted by a red box. A line connects this box to a label "LangLinkDir1". On the right is a properties panel with tabs for "Objects", "Find", and "Invisibles". The "Objects" tab is active, showing a tree structure with "Scheme1" as the root, containing "LangLinkValues1", "LangPropRef3", "LangLinkDir1" (highlighted), and "LangPropRef4". Below this are tabs for "Properties" and "Links & Referages". The "Links & Referages" tab is active, showing a table with two columns: "LinkDirection" and "IdLeftRight". The "LinkDirection" column has a dropdown menu currently set to "IdLeftRight". The "IdLeftRight" column has a value of "LangLinkDir1". A red arrow points from the dropdown menu to a label "Change Direction".
